

STATE OF NEW MEXICO  
COUNTY OF EDDY

RESOLUTION NO: R-19-20

OPPOSITION TO SENATE BILL 459 – PROHIBITING THE ISSUANCE  
OF NEW HYDRAULIC FRACTURING PERMITS AND CREATING  
REPORTING REQUIREMENTS

**WHEREAS**, hydraulic fracturing, is a proven technology that has been used in New Mexico for the past 50 years and more than 50,000 times to safely increase production of oil and natural gas; and

**WHEREAS**, using a mixture that is 99.5% sand and water, this technology creates tiny fissures in mineral-rich rock, allowing the extraction of oil and natural gas trapped inside; and

**WHEREAS**, the process of hydraulic fracturing only occurs for a brief period of time during the drilling operations; and

**WHEREAS**, wells that have been fractured can actively produce for decades; and

**WHEREAS**, hydraulic fracturing occurs thousands of feet below the ground and freshwater supplies, with layers of steel casing and cement protecting the ground and water around the well and multiple layers of impermeable clays and salts separating any potable aquifers from the fractured zones thousands of feet and in many cases, even miles below; and

**WHEREAS**, hydraulic fracturing, along with horizontal drilling, greatly reduces the surface footprint and disturbances of oil and gas operations, allowing drilling in multiple directions from one point, rather than one direction from multiple points; and

**WHEREAS**, over the past five decades, there has been NO instance of aquifer contamination reported in New Mexico by this process since its inception; and

**WHEREAS**, one third of New Mexico's general operating fund and over 90% of New Mexico's severance tax funding for capital projects comes from revenues derived from minerals produced as a result of hydraulically fractured wells; and

**WHEREAS**, over 100,000 New Mexico jobs are produced by the strong oil and gas industry expansion made possible through hydraulic fracturing; and

**WHEREAS**, Senate Bill 459 as introduced in the State of New Mexico's 54<sup>th</sup> legislature, first session of 2019 by State Senators Antoinette Sedilla Lopez and Benny Shendo, calls for a four-year ban on hydraulic fracturing; and

STATE OF NEW MEXICO  
COUNTY OF EDDY

RESOLUTION NO: R-19-20

OPPOSITION TO SENATE BILL 459 – PROHIBITING THE ISSUANCE  
OF NEW HYDRAULIC FRACTURING PERMITS AND CREATING  
REPORTING REQUIREMENTS

**WHEREAS**, the net result from four years of banning the practice of hydraulic fracturing would effectively kill a major industry and all of the related investment being made into our State; and

**WHEREAS**, this ban would most certainly, for years to come, have catastrophic, lasting effects on the State of New Mexico and its citizens and would damage our nation's drive towards energy independence; and

**WHEREAS**, the County of Eddy promotes the economic and general welfare of our citizens, as well as, providing a healthy revenue source for the entire State;

**BE IT THEREFORE RESOLVED** that the Board of County Commissioners does hereby oppose Senate Bill 459 in its entirety and encourages the legislature to fully consider the benefits the entire State of New Mexico receives from the deployment of this technology and do the right thing by NOT passing this bill out of committee or out of the Senate.

**APPROVED AND ADOPTED** this 19<sup>th</sup> day of February, 2019.

EDDY COUNTY BOARD OF COMMISSIONERS

ATTEST:

Jon Henry, Commission Chairman

Robin Van Natta, County Clerk
